

ALTO - CHATAIN

0742-19

Étudié spécifiquement pour absorber le son, le tissage de cette toile unie présente une structure perlée qui capte la lumière en grande largeur pour des rideaux et tentures contemporains et colorés. Ses propriétés acoustiques sont optimum lorsqu'il est confectionné en larges plis rouleaux et disposé à environ 15 cm du support. Sa résistance importante à l'abrasion et au boulochage permet également la tapisserie, le gainage ou la confection de panneaux acoustiques. Sa large palette colorée et son prix attractif sauront vous séduire.
