

ALTO M1 - NAUTILUS

0742-01

Designed specifically to absorb sound, the weave of this wide width plain fabric has a pearlised structure which captures light for contemporary curtains and drapes. The acoustic properties are most efficient when the fabric is hung in large folds approximately 15cm from the support. Strong resistance to abrasion and pilling permits the fabric to be used on the wall, as cladding or for the production of acoustic panels. You will be captivated by the extensive color palette and attractive pricing.

Collection	COLLECTION 21
------------	---------------

Brand	LELIEVRE CONTRACT
-------	-------------------

TECHNICAL DATA

Composition	Polyester TCS 51% - Polyester FR 49%
-------------	---

Width	296 cm
-------	--------

Repeat cut	No
------------	----

Drop match	No
------------	----

Care	
------	--

Uses	
------	--

Martindale test	35 000 T
-----------------	----------

Weight / Linear metre	800 g
--------------------------	-------

Fire rating	M1 - IMO PART 7
