

TAPIS APPARITION LUX

8610-02

APPARITION fully reveals the sculptor's gesture. The reliefs become more pronounced, and the contrast between the untouched surface and the carved grooves is intensified, offering a bold and expressive interpretation of the pattern. Three colour harmonies accompany the collection, like three distinct moments of light: - NOX, a nocturnal glow, combining deep violet and amber. - LUX, a radiant light, blending sand and gold tones. - ALBA, the clarity of dawn, expressed through shades of white and linen.

Brand	LELIEVRE PARIS
