About

An inexhaustible source of inspiration, nature captures the eye, sparks curiosity, and astounds us with its endless shapes and colours. We are connected to the elements – earth, water, air – in a constant movement, marked by the rhythm of the seasons.

The Métamorphose collection captures these subtle and elusive changes and evolutions, playing with materials, textures, colours, and patterns. The designs offer delicate transitions of shades, blurred contours, creating a visual aesthetic that suggests a gentle transformation, echoing the phenomenon of metamorphosis. It is an invitation to observe the ever-changing beauty of the natural elements.

Terra

3232

TERRA embodies the essence of the Métamorphose collection. Inspired by an aerial view, this sublime, supple tapestry with relief, a beautiful drape and hand, reveals a natural tableau in perpetual metamorphosis. The channels of the rivers traced in the weave create an imaginary landscape that changes with the seasons, a representation of nature in motion. TERRA is an invitation to contemplate this moving world where each season reshapes the landscape.
